### **Philosophy)**

Decision quality (DQ) is the quality of a decision at the moment the decision is made, regardless of its outcome. Decision quality concepts permit the assurance of both effectiveness and efficiency in analyzing decision problems. In that sense, decision quality can be seen as an extension to decision analysis. Decision quality also describes the process that leads to a high-quality decision.

Some argue in addition that the above effects on character tend to enhance the quality of legislation as well. A society of autonomous, rational, active, and moral decision-makers is more likely to produce good legislation than a society ruled by a self-centered person or a small group of persons who rule over slavish and unreflective subjects.

The Quality Chasm report, for example, underscores that shared decision making is a dynamic process that changes as patients' circumstances and preferences change. As evidence presented in the preceding section indicates, decision-making capacity appears to be less a fixed, unchangeable trait and more a state dependent on a variety of factors.
