Tyre And Rim Standards Manual

The Tyre & Rim Association of Australia Standards Manual is revised on an annual basis to include the advances of new technical data for tyres and rims so that the Manual reflects the latest world wide standards for these products within the jurisdiction of the Association.

Tyre and Rim Association of Australia Standards Manual ...

The graph below shows that at equal tyre pressure and rim width, the Crr gap between a 23mm and a 25mm tyre (for a given tyre) is about 0.3/1000: So, when reading the 2 nd graph in light of the 1 st one, you can see that this 0.3/1000 gap is equivalent to a pressure difference of 1.5 bars / 22PSI.

THE RIGHT TYRE WIDTH ON THE RIGHT RIM WIDTH ...

Load index. The load index on a passenger-car tire is a numerical code stipulating the maximum load (mass, or weight) each tire can carry. For load range "B" tires, ETRTO (ISO-Metric) standards specify the load index rating at an inflation pressure of 36 psi (250 kPa) (table below), while P-Metric standards measure the load capacity at an inflation pressure of 35 psi (240 kPa).

Standards Manual' publications, and meet other applicable rules of the Road Transport (Vehicle Registration) Regulation 2017. All vehicles manufactured since 1973 are fitted with a tyre placard.usually located in the glove box, the engine bay or on a door pillar. It specifies the wheel and tyre combinations recommended by the

Vehicle standards information No. 9

In the first test – the high pressure tolerance test – the tyre is inflated to a series of ever increasing pressures, and must withstand blowing off the rim at each pressure for 24 hours.

Giant updates tyre compatibility list for its hookless ...

If your tyres don't have tread wear indicators and you don't have a gauge, then you can test them with the 20p tyre test. The outer rim of a 20p coin is just under 3mm wide. Place a 20p coin into your tyre's tread grooves. If the outer rim of the coin is obscured then your tyre's comfortably above the legal minimum tread depth.

What is the minium legal tyre tread depth? UK tyre law ...

A new tyre typically has a tread depth close to 8.0mm. NRMA recommends you should start searching for new tyres once the tread depth hits 3.0mm. All car tyres have tread wear indicators in the tread grooves. The tyre's tread grooves are designed to disperse water away from the tyre's contact patch when roads are wet.
